

ÖZGÜR YİĞİT AŞİT

COMPUTER ENGINEER | SOFTWARE DEVELOPER

Izmir, Türkiye | +90 537 291 98 98 | yigitasit2000@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Engineer and software developer with hands-on experience building full-stack web applications, interactive 3D interfaces, QR-based customer experiences, and machine learning systems. Skilled in React, TypeScript, JavaScript, Python, C#, ASP.NET Core, Flutter, REST APIs, SQL/MSSQL, MongoDB, TensorFlow, Docker, and Git. Experienced in translating real-world requirements into responsive, maintainable software and supporting enterprise IT systems in a manufacturing environment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL, HTML5, CSS3

Frontend / 3D: React, Tailwind CSS, Three.js, React Three Fiber, Responsive Web Design, Blender

Mobile / Backend: Flutter, React Native, ASP.NET Core, Node.js, Express.js, FastAPI, REST APIs, JSON

Data / AI: MSSQL, MongoDB, TensorFlow, Keras, Scikit-learn, XGBoost, CNN, LSTM, NumPy, Pandas

Tools / Enterprise: Git, GitHub, Docker, Canias ERP, SAP exposure

PROFESSIONAL EXPERIENCE

Gates Corporation - IT Intern | Izmir, Türkiye | Jul 2024 - Aug 2024

Supported factory IT operations across endpoints, servers, ERP/database workflows, and personnel devices in a manufacturing environment.

Worked with Canias ERP and SQL-based data maintenance, with exposure to SAP and enterprise system operations.

Diagnosed hardware and software issues and assisted with continuity of factory computer systems and user support.

Participated in recovery activities during the 2024 global CrowdStrike outage, collaborating with the IT team to restore affected factory systems.

SELECTED PROJECTS

Interactive 3D Restaurant Menu | React, TypeScript, Three.js, React Three Fiber, Blender

Built a scroll-driven 3D digital menu with animated camera movement and page-turn interactions designed for desktop and mobile use.

Integrated Blender-created 3D assets into a responsive web experience and tuned interaction behavior across device sizes.

QR-Based Restaurant Web Menu | React, TypeScript, Vite, Responsive Web Design

Developed a mobile-first QR-accessible restaurant menu with responsive layouts, clear category navigation, and reusable customer-facing UI components.

Focused on fast access, usability, branded presentation, and deployment-ready web architecture for real restaurant use.

Car Service Management Platform | React, Tailwind CSS, ASP.NET Core, C#, MSSQL, Entity Framework

Built a full-stack web application with CRUD workflows, authentication, role-based access control, and relational database integration.

Developed the frontend, backend, and database layer as an end-to-end software project.

FTIR-Based Microorganism Classification | Python, TensorFlow/Keras, Scikit-learn, XGBoost

Developed and evaluated ML/DL models on 100,000+ FTIR spectra; the best-performing 1D-CNN achieved 92.31% test accuracy.

Applied preprocessing, data augmentation, spectral feature engineering, class balancing, and comparative evaluation across CNN, LSTM, Random Forest, XGBoost, and SVM.

EDUCATION

Burdur Mehmet Akif Ersoy University - B.Sc. in Computer Engineering | Sep 2018 - Jun 2026

LANGUAGES

Turkish: Native | English: B2 (Upper-Intermediate)
